University Open Ended Items

Open 1   What aspects of this course helped you learn?

I loved the stat modeling portion of the class at the end

The professor was extremely polite and encouraging to students

Having the notes on Canvas helped so I can just pay attention in class as opposed to worrying about writing everything down.

homeworks

The lecture notes being posted on Canvas in a timely manner as well as the textbook being provided to us for free.

Course content was very good and very well structured. Instructor was very helpful and really helped me improve during the course

Showed enthusiasm during lecture. Made coming to class enjoyable.

having one homework a week is my preferred way of learning in a university setting. Courses which slam you with multiple assignments per week tend to take more of my time while teaching me less. It was very apparent that Professor Bhattacharjee was concerned first with whether or not we were learning the content, rather than slamming us with assignments. She gave us knowledge checks about once a week which were low stakes, low pressure, and mostly served as a useful diagnostic for us to know how we are doing and what we need to work on. Great Professor.

Open 2   What changes to this course could improve your learning?

I would just add more assignments

Professor moves kind of fast, I don't think slowing down would hurt class experience.

Lectures could be hard to follow and it was tough to keep up with note taking

While statistics is a very abstract concept, I think that a course designed for engineers should incorporate assignments which show the real world application of the tools we are learning.

Overcomplicated for people who don't know statistics

organized notes

Difficult course, maybe tackling easier problems before the harder ones could help understanding during lecture.

None

I thought this was a pretty standard math/stat course. Nothing really needs to be changed.

Definitely has been a life saver in this course with the study sessions and discussions. Really does a great job teaching the material though someone's there is a divide between what the students comprend and what the TA sees as simple enough for everyone to get, though it's been common for all people who are far advanced in the subject matter. Overall she has been an exceptional TA

Spoke very quickly; the presentation of material was disorganized: writing and rewriting over the slides. The slides were messy and hard to follow. On days where the slides were created ahead of time, the lecture moved even more quickly. The instructor was amazingly approachable, kind, and understanding.

Satarupa is extremely knowledgeable with the material. Additionally, she was responsive to questions outside of office hours (via email, etc.) and this was very helpful to me. I appreciate the time and effort Satarupa put towards helping me and she definitely contributed to a better understanding of the material in the class for me. She is a great TA!

Excellent TA. I learned probably 80% of what I took away in this class by going to office hours and discussions. She organizes everything very clearly and provides excellent explanations to everything. I could not be more thankful for the help Satarupa provided in me passing this class.

She did above and beyond to help me understand the material, do my homework well and prepare for the hard quizzes. She provided me with maybe 3 or 4 times extra hour after her regular office hours to explain the parts I was having difficulty to understand. She is the best in explaining hard things be easy and I really really wish she was the one teaching the class instead.

Satarupta has been one of the strongest instructors I have had in the Statistics department. She really ensures that a lot of her students understand the content through active participation in lecture and during office hours (she was also my TA for STA 131B Winter Quarter 2021, so it's no surprise that her quality of teaching is still really strong)

This was a wonderfully taught course! I really appreciate Satarupa's teaching style and openness to questions and interaction in lectures. I found lectures very engaging and homework and exams to be extremely fair and reasonable(maybe too easy).
